

AI-Era Career Roadmap

Personalized Strategic Plan | Working Professional → Target Role in 6 Months

Prepared by: Elite AI Career Strategist 6-Month Sprint

Current Position

Role Type: Working Professional | Timeline: 6 Months

Core Strengths:

Azure Cloud Architecture App Security AI Security SSRS Reporting
Microsoft Copilot Enterprise App Dev

You already sit at the rare intersection of **Cloud Architecture + Security + AI** — a high-demand, low-supply combination in today's market.

Target Goal

Primary Goal: Land a job as **Senior Azure Cloud Security Architect / AI Security Engineer** within 6 months.

Target Comp: Senior/Lead Level Market: High Demand
Mode: Full-time / Remote-friendly

Fastest Path: Certify → Build 2-3 proof-of-work projects → Optimize personal brand → Network into warm referrals → Apply strategically (weeks 18-24).

Skill Gap Analysis

Category	You Have	Gap to Close
Cloud & Security Certs	Practical Azure architecture & security experience	AZ-500 SC-100 formal validation
AI Security Depth	Working AI Security & Copilot exposure	OWASP LLM Top 10 MITRE ATLAS AI-102
Automation/Coding	Enterprise app development background	Python security scripting Terraform/IaC
Proof of Work	Strong on-the-job delivery	Public portfolio GitHub case studies
Personal Brand	Deep technical credibility	LinkedIn visibility ATS-optimized resume

🔗 Learning Plan

- M1-2:** AZ-500 + SC-100 refresh
- M2-3:** OWASP LLM Top 10, MITRE ATLAS
- M3:** AI-102 fundamentals
- M3-4:** Python for security automation
- M4:** Terraform / IaC basics
- M5-6:** Applied interview drills (system design + case studies)

Suggested Projects

- Secure Azure Landing Zone integrated with Copilot governance controls
- LLM/AI red-team assessment using OWASP LLM Top 10 framework
- Automated security compliance dashboard (SSRS + Power BI)
- Enterprise app security review — published case study

Networking Strategy

- Post weekly on LinkedIn: Azure + AI security insights
- Join Azure Security & OWASP AI communities
- Attend Microsoft/Azure security webinars & meetups
- Run 2 informational interviews/month with target-company insiders
- Engage recruiters specializing in cloud security roles

Monthly Milestones

Month 1 Start AZ-500/SC-100 prep; refresh LinkedIn profile	Month 2 Complete 1 cert; begin OWASP LLM Top 10 study	Month 3 Launch Project 1 (Landing Zone); start Python scripting	Month 4 Complete Project 2 (AI red-team); publish on GitHub/LinkedIn	Month 5 Resume overhaul; mock interviews; active networking	Month 6 Targeted applications; referrals; close offer
--	---	---	--	---	---

Immediate Next Actions (This Week)

1. Rewrite LinkedIn headline & About section around Cloud + AI Security	2. Enroll in AZ-500 refresh course; book exam date	3. Create GitHub repo for portfolio Project 1	4. Message 3 people for informational interviews
